NO POST SEASON GAMES.
St. Louis, Mo., Sept. 18.—No fall series between the St. Louis clubs of the National and American leagues will be held this year, as in previous peasons, it was officially announced Thursday night. The reasons given were poor receipts in former years and the expiration of players contracts.

WHEN REDS WON TITLE. Cincinnati did have a championship team in 1842. They won the American association rennant that year, but it was hardly a representative league then.

The El Paso Overland Com-pany's NEW USED CAR EM-PORIUM will be open tonight and Saturday night. You are cor-inlly invited to come up and caspect our used cars of quality.

We know you will be pleased to find used cars that have been placed in such excellent mechanical condition. In point of general appearance nothing has been spared in making these cars 100% efficient.

We believe in doing things the RIGHT WAY and you will learn that the right way is the OVERLAND WAY.

I'll Say So

El Paso Overland Co Used Car Dept.

scores of the men in their owsagues.

I want all you fellows who are
wishing you knew which team
would win the series to start right
in and dope the series with mebon't say it can't be done. It can,
I doped the two major lengues this
spring, the hardest season to dope
we ever had because of constant
trades, sales and releases of players which altered team strengths.
Of the 16 clubs 12 show nors almost exactly the percentage they
figured to win and lose during
the year.
The system is not hard. You can d

formance during this season, considered with the official figures of last season. How to Bope it Yourself.

The system, briefly, is this: The full strength of a team is 100 percent. If the defensive value of all teams exactly equaled the attacking value no ream ever would score a run. By taking figures for a dozen years, I discovered that the attacking strength of any team is 64 percent and the defensive may not be enactly right, but they are approximately correct. I reached the figures by taking the number of bases may not be exactly right, but they are advanced in comparison with suta and the proper proportion holds good year after year. That means that batting, after year. That means that batting, after year. That means that batting after year. The means that batting after year. That means that batting after year. The means that batting, after year on the real may be a fine of the statistic of attack, are more yaluable than the learned of defence.

To decide the attacking value of any player do not rely upon his batting, alone. His attacking value is hitting, show these on balls, hit by pitched hall, sacrifice hits, stolen bases and speed-by speed meaning his ability to take two bases on a doubtful double until be entablished its value.

The average attacking warth of each man is therefore one-slinth of the total team attacking value or? percent, which I carry eat to thousandishe, making it 700. It makes no difference whether we say 3, 7, 80 or 750 it the proportion is maintained. Each man, theoretically, is 700 in strucking value. We know this is not true, as some men hit, run and alide better thus others. But, if the average batter thus others. But, if the average hatter thus others.

the approximate scores of the games.

Weak in Spots.

In commencing this study, I discovered an odd thing—that the teams are arrong in the same positions and that their weakinesses are in the same epots. This applies to avery position on the clubs and leads one to wonder if there is anything in such construction that will explain their victories in their own langues. We will discover, too, that maither team measures up with former standards of world's acries clubs. Neither is a great bail cith and each has serious defects in construction. However, what interests us now is to discover which will win the series. We will start by studying the first basewing start by studying the first basewing start by studying the first basewing and comparing them, point by point to discover their values.—Copyright, 1919, by the Bell Syndicate.
